

The background of the slide is a close-up photograph of dark asphalt pavement that has cracked into a dense, irregular pattern of small, interconnected polygons, resembling a cracked eggshell or a dry lake bed. The cracks are light-colored, creating a high-contrast texture against the dark asphalt.

City of Woodland
Road Maintenance Program
2016 Project Update
October 18, 2016

Maintenance Zones

2016 Road Work

Current Project Costs
